# **Stainless Steel Insert Ball Bearing Units**

**ASAHI** stainless steel ball bearing units provide the excellent corrosion resistance as well as self-alignment; all stainless steel insert bearings incorporated with stainless cast steel housings. The insert bearing is lubricated with NSF H-1 food grade grease as standard, and also available with heat-resistant lubricant for the stable performance at high temperature. The housing is renewed with beautiful surface and solid base suitable for the hygienically clean environment by the lost wax casting process. This series can be also served with stainless steel covers on request for steady protection against dusty conditions.

## **Feature 1**

### **Excellent corrosion resistance**

Both insert bearing and housing are made of stainless steel and suitable for various harsh environments.

## **Feature 2**

### **Best for food processing machines**

Insert bearing MUC200V type conforms to the RoHS Directive and is lubricated with NSF H-1 food grade grease as standard.

## **Feature 3**

### **Dimensionally interchangeable with the ordinary JIS types**

Insert bearing MUC type is interchangeable with UC type.

## **Feature 4**

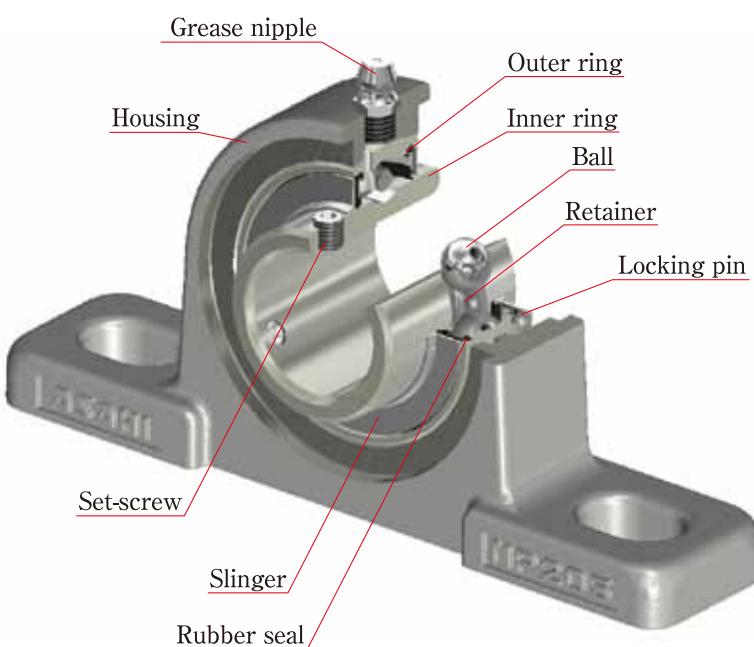

### **Good looking housing with solid base**

Housing characterized by smooth surface and solid base is ideal for creating and maintaining the hygienically clean environment.

## **Feature 5**

### **Stainless steel covers are available**

For harsh condition, stainless steel covers are available on request.
